

TIPS THAT WILL HELP YOU TREND GREEN

SPACE

Cats are exploratory creatures and love to investigate both horizontal and vertical spaces. Let your cat have access to several rooms in the house where the furniture varies; book cases, chairs, tables and so on.

SAFETY

Cats love enclosed spaces where they can hide and observe the world around them. Cardboard boxes make ideal dens. So try to bring 2 new boxes home with you each week to replace 2 of the cat's old boxes.

PLAY

Some sociable cats also love to play games. Soft toys on elastic strings are particularly effective as they mimic how a real prey animal might behave.

ROUTINE-ROUTINE-ROUTINE

Cats are creatures of habit and they don't like surprises! Try to keep to a daily routine around feeding times, outdoor times, cuddle times and so on.

LOVE & CUDDLES

If your cat is the sociable friendly personality type, make sure that you spend at least 10 – 15 minutes each days for relaxing grooming and cuddles. Note that some cats also enjoy being with other cats.

STIMULATING THE SENSES

As predators, cats are very tuned in to the sights, sounds and smells around them. Cats love watching the world go by from a window, and you can stimulate their noses with herbs like catnip.

CLAW SCRATCHING

Cats need to keep their claws in tip-top shape and they do this by scratching rough surfaces. To avoid your cat using your furniture, simply provide your cat with both vertical and horizontal 'scratching posts, there are many different commercial models available.

SLEEP

Cats spend a great deal of time resting or asleep, but they need to feel safe. So please make sure your cat has exclusive access to several different locations including – raised areas, dark areas, quiet areas etc.
